

DMT project "Connecting the threads" powered by the ESF

The DMT project "Connecting the threads" is made possible by support from the ESF (European Social Fund).

Dit project is mede mogelijk
gemaakt door het Europees
Sociaal Fonds van de
Europese Unie

DMT focuses on those issues which really matter to her. The same applies to it's employees. The purpose is to ensure that:

- DMT is distinctive in its field and contributes to the sustainable development of people, planet and economy (our Purpose for Existing).
- Everyone is in the right place and doing the right job. Our employees and teams can work from their strength.
- Each individual employee can bring his or her personal motivations in line with those of DMT and is therefore connected to the Reason for Existing and Big Five of DMT.
- There are plenty of opportunities for employees to grow.

The project contributes to the achievement of sustainable employability in which employees understand their own motivations, talents and development opportunities. For themselves and their colleagues.

The result is an organization where everyone is enthusiastic, passionate and has the same focus to pursue the common goals. This is an enrichment which raises the social climate, the culture, personal development and health of the employees.

In the long term this provides (self) development, enterprising and motivated employees who are healthier. Which results in higher employee satisfaction. And satisfied employees will contribute more to customer satisfaction and lasting results.
